

Erasmus+ KA229 Integrating technology in the teaching process,
path towards building 21st century skills

LTTA1 report

14th - 18th January 2019 Targu Jiu, Romania

Monday, 14th January 2019

All project partners met at Technical College Gheorghe Magheru which is the host school. The principal Mrs Carmen Danaricu welcomed participant and presented the hosting school. Especially the EU projects they were and are still involved in. The school is part of CISCO Academy and ACDL centre.

The second presentations was held by Slovenian partner. They presented the country, city Kamnik, school programmes and several activities (sport, research, several competitions, theater, etc.).

The third presentation was held by Portugal partner. They presented history of Portugal, the city of Lisbon, education system, school curriculum in field of geographic sciences.

The forth presentation was held by Turkish partner. They presented school, its curriculum and extra curriculum (robotics and 3-D modeling).

Project partners were guests at ceremony in front of the monument of the national heroine Ecaterina Teodorescu. She was born 125 years ago in Targu Jiu.

Renata presented Slovenia and Slovenian partner school

Tuesday, 15th January 2019

In the morning the vice mayor Mr. Adrian-Marcel Tudor - Draghici welcomed the project partners. He presented county Gorj and municipality of Targu Jiu. He expressed the support to the EU projects like this.

The coordinator Marius Buzera presented the main project aims, needs and objectives. He presented the results of the debates carried out within each partner regarding the role of ICT in acquiring the 21st century skills.

At workshop he presented two tools for self assessment of ICT usage for teaching and learning:

- Future classroom toolkit by European Schoolnet - five dimensions of innovation Maturity Model for self assessment of school, teachers and students.
Marius tested the tool for his school and himself. He exposed positive and negative experience.
- SELFIE is customisable tool for teachers, students and management.
To get relevant results is necessary that about 20% of the school population must fill the questionnaire.

The Portuguese partner proposed to create new tool which will allow more scientific data analysis.

Wednesday, 16th January 2019

The coordinator Marius Buzera presented collaborative platform Slack and its positive and negative aspects. He tested the platform and its functionality with the group of students. The partners discussed about using it in project as our working space. It will be necessary to select apps to add inside for specific purposes like Padlet, Snippet, Zoom, Skype, Google Doc, Google Drive etc. Before applying Slack the team has to check for how many participants can be used it for free.

The audience during presentations

The main project product will be:

Good practices Guide on ICT implementation in transdisciplinary teaching of subjects, which will include the following chapters:

- Chapter 1 - The role of ICT in training The Competences of the 21st Century
- Chapter 2 - Evaluation of the use of ICT in the teaching process at the level of a school institution
- Chapter 3 - Applications , software and hardware solutions used in the teaching-learning-evaluation process
- Chapter 4 - Basic vs. modern teaching approaches

Ad Chapter 1:

Each project partner will prepare their point of view of this topic until end of January 2019. The Romanian partner will collect the ideas and make conclusions.

Ad Chapter 2:

Partners are in the process of creating their own questionnaire which will contain selected criteria to allow regression analysis produced by Portuguese partner.

Ad Chapter 3:

For each chosen app is necessary to check what kind of hardware and operating system is needed as well as practical functionality.

Ad Chapter 4: The topic will be discussed in LTТА-2 in Kamnik, Slovenia.

At the afternoon workshop the criteria of selection the students who will participate at LTТА-3 in Istanbul, Turkey, were discussed. Hosting family could be problem therefore Turkish partner will try to find another solution (hostel or dormitory).

Thursday, 17th January 2019

In the morning every partner individually discussed each questions could be selected from the Selfie questionnaire according to the key competencies of the 21st century for qualitative regression model analyses.

That day the road to the Parang Mountains ski resort Ranca after heavy snowfall was opened and the group decided to take the opportunity to go there as it was initially planned. The resort is 60 km far from Targu Jiu in direction Novaci at the altitude of 1600 meters above sea level. The landscape looks spectacular and is worth seeing it especially in the winter conditions.

At the Ranca ski resort

The first hour was reserved for the physical activities and getting some facts about that part of the county Gorj. In the cottage it was treated some previous experiences of the partners in the European projects, organizational challenges at each school and approaches to the effective data processing in the project.

In the evening the Romanian coordinating school organised the common dinner in the traditional restaurant Hanul Domnesc in the city centre. It was opportunity to know better each other in the relaxed atmosphere.

Friday, 18th January 2019

At CTGM school was firstly organized round table with the specialists from the University of Constantin Brancusi who gave some hints for the analyses of the project activities and project results.

After that the partners accepted conclusions about the learning, training and teaching activities in Targu Jiu.

Every participants received the Certificate of Attendance for contributions at C1 project meeting.

Every participants filled in the evaluational survey which contains different aspects of organisation and execution of the project week.
